## Poetical.

## Autumn Payments.

"The melancholy days have come,  
The saddest of the year,"  
When notes are due, and lengthy bills  
Come in from far and near;  
When, "there's a small account of yours,"  
Is whispered in your ear,  
And, "won't you please to settle now,"  
Is all the talk you hear.

You scarce can take a morning's walk,  
Without ere long you're met  
By Mr. Snooks, who wants to know  
If you can't "settle" yet;  
And at the hour of "dinner etc.,"  
When you do homeward lie,  
Upon the parlor table, lo!  
A pile of bills do lie.

Ye chaps, whose salary amounts  
To ten times ten a year,  
Who sport your patent leather boots  
With such a "foreign" air;  
Who wear your thirteen dollar "lights,"  
And golden-buttoned vest,  
I wonder now when Autumn comes  
You seek in vain for rest.

Ye girls with empty bonnets stuck,  
Upon your empty heads,  
With high-priced silks and satin trims,  
And laces, and bows, and beads—  
I wonder what "papa" will say,  
When Mr. Spriggins calls  
With just that "little bill" of his,  
For bonnets, hoops, and shawls.

And now, my stylish little chap,  
And fashionable maid,  
I'll tell you what you'd better do  
When those long bills are paid—  
Just spend as many dollars then  
Upon your addled brain,  
As you have spent for costly clothes,  
And see how much you'll gain.

## Going Up and Coming Down.

This is a simple song, 'tis true,  
And songs like these are never nice;  
And yet they'll try and scatter through  
A pinch or two of good advice.  
Then listen, pious friends, and learn,  
Never to boast of much renown;  
For fortune's wheel is on the turn,  
And some go up, and some go down.

We know a vast amount of stocks  
A vast amount of pride in us;  
But fate has picked so many locks,  
We wouldn't like to warrant yours.  
Remember, then, and never spurn  
The one who's hand is hard and brown;  
For he is likely to go up,  
And you are likely to come down.

Another thing you will agree,  
(The truth may be as well confessed)  
That "God's Justice" is a real thing,  
Is but a really thing at best.  
And though the fishes large and strong  
May seek the little ones to drown,  
Yet fishes of little make small  
Are going up and coming down.

Our lives are full of chance and change,  
And there's no telling when we're sure;  
And there's a doctrine new and strange  
That places high are most secure.  
And though the fickle god may smile,  
And yield the scepter and the crown,  
The only safe and sound advice  
Then is to go up and come down.

This world for you and me, my friend,  
Hath something more than pounds and pence;  
Then let me humbly recommend  
A little use of common sense.  
Thus by all paths of peace and love,  
And having taken the golden crown,  
For you'll see him going up,  
When you are only coming down.

## Revolutionary Men and Reminiscences.

A correspondent of the Petersburg Express, writing from "near Lexington, Jefferson county, Virginia," sends that paper an interesting letter about Revolutionary men and reminiscences, from which we make the following extract:

In the immediate vicinity of the spot from which I address you these lines, are the dilapidated and antique residences of three distinguished Major Generals of the American Revolution. Within a radius of one mile and a half lived, long and weary years, Charles Lee, the sinister hero of Monmouth; Horatio Gates, the loser of the battle of Camden; and the Southern campaigner, and Adam Stephen, the early friend of Washington. In this little village—on whose golden forests I am gazing—under the shadows of the great woods here—remote from camps and the flashing sword, these three warriors rusted out the remainder of their lives in inglorious repose, the swords in north-easterly scabbards, no more to be drawn. Here, if I may take note of two of them died, and soon after these two, the remains of them will crumble and disappear, as their figures are fading from the general mind!

Lee's house is a hundred paces from the little assemblage of houses called by his name, and is an oblong building of stone, with chimneys at each end and midway—low, with a rude porch, depending, as it were, above the rough door, and with few out-houses. Gates lived somewhat further from the town, in a plain, undecorated building; and Stephen occupied a mansion probably built by the earliest pioneers of the valley, in which everything is small and confined but the fire-place. But that is neither small or confined. It is grand—enormous! Around it how many good companions must have gathered in the olden day, and what sounds of revelry shook the rafters overhead! You may read of Adam Stephen in Sparks' edition of the writings of Washington; and there you will find that among the hardy gentlemen who stood shoulder to shoulder with the young chief at Winchester, when the Indians ravaged the valley a hundred years ago, was Lieutenant Stephen. A large handed proprietor hereabouts, he doubtless resented the trespass of the Indians upon his grounds, stretching toward the foot of the great North Mountain—at least, we know that he did good service. He was afterwards an effective officer of the Revolutionary struggle, but

left the army about the period of the battle of Princeton, disgusted at something or other—and so came hither, and lived and died.

Of Gates and Lee, more is known; the story of the woful quarrel of the latter with Washington at Monmouth, you may read in full in the recently published third volume of Irving's great work. It is probable that history will finally show that Lee was not so much in the wrong as the world supposes. That he made a blunder in ordering his forces to retreat—and that this retreat very nearly ruined all the plans of Washington, and lost us the battle—this is certain. But it was probably an error of judgment—not a want of courage. In Lee's great picture, he sits on his horse, suddenly before the Chief, whose hot anger flames out—all that he did and said afterwards was sullen too, unfortunately.

High words—indignant correspondence—Washington cold and laconic—Lee raging; then a court martial—suspension for a year—and Lee, in utter disgust, threw up his commission, and came hither "to live tobacco"—that being the best school for a General," he said, with a sneer at Washington. And here in this poor and obscure dwelling, as I have said, rusted out the sharp spirit of Lee, and fell into dust and oblivion. With few neighbors—no friends; surrounded by bounds and horses, and making the chase his only occupation, nearly; thus lived the General and died. One day, long afterwards, says a tradition of the neighborhood, Washington sent his old adversary a note, saying that he would call on a certain morning and see him; that he hoped all past contention and bitterness had been forgotten—he was coming to see him as an old comrade in arms—as a friend.

On the day fixed for the visit, Lee sent away all his servants—placed upon the locked front door a paper with "No meat cooked here to-day," written thereon—and then followed his servants, leaving Washington to knock in vain. He never returned, and with the passing year, the eccentric soldier grew more morose and repelling. The ground floor of his house was divided by chalk lines, forming four compartments. In the first he kept his books—in the second was his bed—in the third the saddles and hunting gear in the fourth; the fourth was used for a kitchen. He could thus sit in one spot, he said with grim humor, and overlook his entire household. Tired of his dogs and his silent misanthropy at last, he commenced his "Queries, Political and Military"—an attack on Washington. But the world declined listening to him, and then, tired of life, the cynical spirit of Charles Lee fled to other realms. His last words were—"Stand by me, my brave grenadiers!" and so he ended.

A word now of the third day of my triad of warriors. Horatio Gates came to the old house under Camden.

It was the Gates who had taken Burgoyne, and whose popularity at one time overshadowed Washington's. But now alas! how fallen! The breath of an indignant public opinion had blasted him, and his laurels were all scorched and withered. He had lost the battle of Camden—had been deposed from the command of the army of the South, to make way for Greene—over his head hovered a heavy cloud of public execration almost; and Congress, it was said, had prepared its thunderbolt to strike him. But the bolt never fell. The sad soldier's sorrow was respected. They left him to die in peace here—enough punishment that the magnificent drama of the Revolution was played out, independent of one who had enacted so splendid a part in the earlier acts.

These three old wooden houses are the visible remains of three vigorous lives—in them to the musing eye, the spirits of Gates, and Lee, and Stephen, hover around them still, speaking in every whisper of the pine trees and the oaks; those ancient oaks of the noble English looking "chase" which murmur yonder beneath the window—through whose lengthened vista appears the lone mansion of General Adam Stephen.

Here, within a gun shot almost of each other, these men of history reposed—though not happily we must conclude—after all their struggles. The current of the Opequon, resonant in old days with savage shouts and dyed with blood, murmured by them; and perhaps spoke to their minds of other days, typifying human things which ever bud and flow; and change like the skies of Autumn yonder—the gorgeous leaves, whose colors vary with each day.

HABITS.—Like flakes of snow that fall unperceived upon the earth, seeming unimportant events of life succeed one another. As the snow gathers to a single flake that is added to the pile produces a sensible change, no single action creates—however it may exhibit a man's character; but as the tempest hurls the avalanche down the mountains and overwhelms the inhabitant and his habitation, so passion, acting upon the elements of mischief which pernicious habits have brought together by imperceptible accumulation, may overthrow the edifice of truth and virtue.

For Mother's Eyes.—Mothers who encourage their daughters in superficial accomplishments and bodily display, are often preparing for them a life time of chagrin and misery. On the other hand, when they are trained at home, by precept and example, in retiring, industrious, studious, virtuous habits, they are prepared to be useful and happy throughout life.

Of Course Not.—An old stick says:—"I have seen women so delicate that they were afraid to ride, for fear of the horse running away—afraid to sail, for fear the boat might upset—afraid to walk, for fear that the dew might fall—but I never saw one afraid to be married."

## Big Brindle.

In Nashville, many years ago, there resided a gentleman of great hospitality, large fortune, and though uneducated, possessed of hard sense. Col. W. had been Judge of the county court.

His elevation, however, had made him somewhat pompous, and became very fond of using big words. On his farm he had a large mischievous ox, called "Big Brindle," which frequently broke down his neighbors' fences, and committed other depredations, much to the Colonel's annoyance.

One morning, after breakfast, in the presence of some gentlemen who had staid with him over the night, and who were now on their way to town, he called his overseer, and said to him:—"Mr. Allen, I desire you to impound Big Brindle, in order that I may hear no more animadversions on his eternal depredations."

Allen bowed and walked off, sorely puzzled to know what the Colonel meant. So after Col. W. left for town, he went to his wife and asked her what Colonel W. meant by telling him to "impound" the ox?

"Why," said she, "the Colonel meant to tell you to put him in a pen."

Allen left to perform the feat, for it was no inconsiderable one, as the animal was very wild and vicious, and after a great deal of trouble and vexation, he succeeded.

"Well," said he, wiping the perspiration from his brow, and soliloquizing, "this is impounding it? Now I am dead sure the old Colonel will ask me if I have impounded Big Brindle, and I will let that puzzle him as bad as he did me."

The next day the Colonel gave a dinner party, and, as he was not aristocratic, Allen, the overseer, sat down with the company. After the second or third glass was discussed, the Colonel turned to the overseer, and said:

"Eh, Mr. Allen, did you impound Big Brindle, sir?"

Allen straightened himself, and looking around at the company, said:—"Yes, I did, but Big Brindle transgressed the impoundment, and scattered all over the equanimity of the forest."

The company burst into an immoderate fit of laughter, while the Colonel's face reddened with discomfiture.

"What do you mean by that, sir?" said he.

"Why, I mean, Colonel," said Allen, "that Big Brindle being disgruntled with an idea of the cholery, ripped and tore, and scattered and pawed dirt, jumped the fence, took to the woods, and would not be impounded no how."

This was too much; the company roared again, in which the Colonel was forced to join, and in the midst of the laughter, Allen left the table, saying to himself as he went:

"I reckon the Colonel won't ask me to impound any more oxen."

"Lift a bucket of water from the Mississippi river at New Orleans, and ask yourself the question, 'from whence it came,' and the answer may be, from the sandy deserts of New Mexico, from the pine hills of Carolina, from the rolling prairies of Nebraska, or from the cotton fields of Georgia; from the British possessions, North of the 49th degree of latitude, separated by a thin ridge of ice-covered rocks from streams that flow into the Arctic Ocean, or from bowers of orange and magnolia that perfume the cane-fields of Louisiana; from the frozen lakes that gem the bosoms of Minnesota and Wisconsin, or from the sunny fountains that gush up from the flowery plains of Alabama and Tennessee; from the hill sides of waving grain in Pennsylvania, Virginia, and Maryland. It may be a part of those mighty volumes that roll their never-tiring waves through Iowa and Missouri; through Illinois, Indiana, and Ohio; through Kentucky and Arkansas, Mississippi and Texas. It is a part of the ten thousand little rills that come hynning their way from that mountain range wherein arise the Columbia and Colorado of the West, or of those from whence the Delaware and Susquehanna hasten away to meet the rising sun.

In the spurs of the Alleghany it has saluted the springs of the Roanoke and Saluda; and far beyond the Black Hills it has locked arms with the mighty Saskatchewan as he hurried on his cheerless journey to Hudson's Bay. The springs of the Connecticut listen to the roar of Niagara; and the fountains of the Platte overlook the craters of the extinct volcanoes of Utah. It has fertilized a country greater than the empire of Alexander, and has carried a richer commerce than all the rivers tributary to Imperial Rome."

Slander.—Against slander there is no defence. Hell cannot boast so foul a fend, no man deplore so foul a foe. It stabs with a word, with a nod, with a shrug, with a smile. It is the pestilence walking in darkness, spreading contagion far and wide, which the most wary traveler cannot avoid. It is the heart-scorching dagger of the assassin. It is the poisoned arrow whose wound is incurable. It is as mortal as the sting of the deadly adder; murder is its employment, innocence its prey, and ruin its sport.

Of Course Not.—An old stick says:—"I have seen women so delicate that they were afraid to ride, for fear of the horse running away—afraid to sail, for fear the boat might upset—afraid to walk, for fear that the dew might fall—but I never saw one afraid to be married."

Life is a brass farthing, and in the toss up between fate and each human being, high birth and low birth, riches and poverty, wisdom and folly, learning and ignorance, virtue and vice are but other names for head and tail.

## Stuck-up Folks.

"I don't like those people, they are so dreadfully stuck-up," was the remark we overheard the other day. What are stuck-up people? thought we, and we have been looking about to see if we could find any.

Do you see that young man over yonder, leaning up to the post at that hotel piazza, twirling a shadowy walking-stick, now and then cooing the hair on his upper lip, and watching every lady that passes, not that he cares to see them, but is anxious to know whether they observe him; he belongs to the stuck-up folks. What is the occasion? Well, he happens to have a rich father, and foolish and vain mother, who have taught him that he isn't common folks at all, and that poverty is almost the same as vulgarity and meanness, and so he has become stuck-up; he doesn't take the pains to learn anything, for he doesn't feel the need of knowing any more; he dares not work, for he was never required to, and he is so extensively stuck-up that he hasn't the idea that he will ever come down; he doesn't know, how ever.

There goes a young woman—lady she calls herself—with the most condescending air to no one in particular, and an all-pervading consciousness that creation and the rest of mankind are looking at and admiring her; she has never earned the salt she eats, knows a little, very little, of a good many things, and nothing thoroughly of anything; is most anxious lest she should be troubled to make a selection out of fifty young men, all of whom are dying for her she supposes; she is one of the stuck-up folks, and that is about all she is.

The oldish gentleman, over the way, barricaded with a half a yard of shirt collar, guarded with a gold-headed cane, with a pompous patronizing air—do you see him? Well, he is one of those stuck-up too. He has been so about ten years, since he got off his leather apron, and began to speculate successfully in real estate.

There are other folks of this class, some stuck-up by having at some time been constable, a justice of the peace, an alderman, and in various other ways they got stuck-up notions. They are not proud people, for they do not rise to dignity of pride; they are not distinguished folks, for they have not ability or character enough to make them so—they are just what they appear to be, "stuck-up." Let them stick,—Jersey City Courier.

An Arkansas correspondent of the New Orleans Picayune, gives the following as authentic:

You are all fond of cracking jokes at the expense of Arkansas; now here is one on your own State, absolutely true. I got it from an eye witness:

The district court in one of your Northern parishes was in session—twice the first day of the court; time, after dinner. Lawyers and others had dined and were sitting out before the hotel, and a long, lank, unsophisticated countryman came up and unceremoniously made himself one of 'em, and remarked:

"Gentlemen, I wish you would go on with this court, for I want to go home, I left Betsy a looking out."

"Ah!" said one of the lawyers, "and pray what detain you at court?"

"Why, sir," said the countryman, "I'm fished here as a jury, and they say if I go home they will have to find me, and they moutn't do that as I live a good piece."

"What jury are you on?" asked the lawyer.

"What jury?"

"Yes, what jury. Grand or traverse jury?"

"Grand or traverse jury? I don't fished if I know?"

"Well," said the lawyer, "did the judge charge you?"

"Well, 'squire," said he, "the little fellow that sits up in the pulpit, and kinder bosses it over the crowd, gin us a talk, but I don't know whether he charged anything or not."

The crowd broke up in a roar of laughter, and the sheriff called court.

STATISTICS.—Married women live longer, on an average, than single ones. The healthiest children are those born in January, February and March. The greatest number of births are in May and June. The months of August and September stand next in this respect.

The fewest deaths take place in November, December, and February.

A Frenchman being troubled with the gout, was asked what difference there was between that and the rheumatism. "One very great difference," replied Monsieur, "suppose you take one vice, put your finger in, turn the screw till you can hear him no longer—that is rheumatism; den 't'pose you give him one turn more—that is gout."

**During the last six months,** the Police of New York City have made 17 arrests for murder, 133 for passing counterfeit money, 71 for result with intent to kill, 9 for arson, 153 burglary, 1492 assault and battery, 23 forgery, 23 gambling, 108 highway. There were 3,224 officers committed against property, 1,873 violations of Corporation ordinances, 32,451 persons were accommodated with lodgings at the several station houses.

**DEATH.**—The Wollborough (N. H.) Police states that on Thursday night a Mrs. Tilton, of North Sandwich, drowned her little girl, one year old, by putting her into a small stream of water, then, and laying a rock upon her to keep her down. She then went to a neighbor's house and told the family what she had done, and requested them to go and take her out, as lying in the water might disfigure her face. She is said to be deranged.

**LIBERIA.**—Those in Kentucky who are going to Liberia this fall from the Southern part of State, will meet in Louisville on the 22d of November and report themselves at Cassady & Hopkins' store on Main street, near to the corner of Third street. Those going from the Northern part of the State will report themselves on the 22d of November, at G. K. Kincaid's office in Lexington. All correspondence in regard to going to Liberia, will be directed to Henry Wingate, Esq., Frankfort, or to myself, at Frankfort.

**SINGULAR AFFAIR.**—Death from the bite of a Spider. A young man named William Maughton employed in Wright's dry goods store, on the corner of Lower Market street and Broadway, was taken to Dr. Freeman's office, yesterday, in a state of great suffering, caused by a Spider's bite near the abdomen, received a few hours before.

The case was treated by Dr. Freeman—two or three other physicians were called in during the afternoon; but as the patient was very low, and they belong to a different school from Dr. Freeman, they did not act in the matter. The sufferings of Mr. H. continued to increase until late in the afternoon, when he died, apparently from the effects of the bite. His remains were taken last evening to the residence of his widowed mother, Newport.

The case has already excited considerable attention in the medical profession, and our physicians, of long practice, state that it is the only affair of the kind which has ever come within their knowledge.

**CATTLE AND HOGS.**—The market during the past week has been overstocked with cattle, chiefly coming at 2 1/2 cts. gross. Choice bulls, which are scarce, command 3 1/2 cts. gross, which is the highest price obtained. The greater number of well fattened hogs are daily driven to the New York market.

At Eminence, a few days since, Mr. Hopkins, of Henry county, sold a superior lot of 90 fat hogs to Mr. Richardson at 4 cts. gross—all for the New York market. They were an extensive lot, averaging 160 lbs.

The market for hogs is dull, with about 600 head in the yards at the stock yards, for the butchers and sausage makers. The prevailing quotation is 4 cts. on foot. Among the parkers we hear of no movement, and quote the market unsettled. Corn is very scarce, and the farmers, though quite firm, are anxious to sell.

Mess pork is dull, and holders were offering round lots yesterday at \$16.50. Bacon was also dull, at 6 1/2 cts. for shoulders, 7 1/2 cts. for clear sides, and 12 cts. for bagged hams.

**CATTLE MARKET PROSPECTS.**—BEEF. In addition to the large stock of beef cattle received in this city last week, numbering over five thousand head, there is a prospect of about an equal supply this week. We hear of over a hundred car loads passing over the Lake Shore railroad in one day, towards Buffalo, besides the number on the Erie road. The usual average number per car at this season is fifteen or sixteen head. These were seven or eight hundred head left unacid at the yards in Forty-fourth street last Wednesday, which will lessen the number actually wanted this week. We were told yesterday by an Ohio drover that he had taken the first offer, and sold his drove at a loss for the first time this year, rather than take his chance in the market on Wednesday. Unless the demand at Albany should be unprecedentedly large for the Eastern markets, we shall probably have a very full market here, and we should not be surprised to see cattle sold at prices only equivalent to 8 or 9 cts. a pound for the meat of good fair market retailing beef. The price would depend entirely upon the butchers, but for one thing; that is, that many of them are obliged to buy cattle every week at just such prices as the cattle brokers see fit to ask them; because they are so irredeemably in debt that they must continue to buy upon credit or break. It is believed that the butchers are constantly in debt to the brokers a million of dollars, and nearly all the cattle are sold upon three or four weeks credit. The drover who brings the cattle to market, and the feeder, get their money, and the cattle broker, who is the commission merchant, takes the responsibility of the credit to the butcher; and that is the cause of the high price of beef to the consumer. If the business was reduced to the cash system, the immediate effect would be to reduce the price of beef to the consumer about twenty-five per cent. It is for this cause that a great surplus of bullocks and over-stocked markets do not reduce the price of butchers' meat in proportion to similar effects upon other kinds of trade. But so far as large supplies of beef stock can have that effect, we are in a fair way now to see the time when a good pound of beef can be bought for a good price.

A little boy, five years of age, belonging to Mrs. Story, on Washburn street, was roasted alive by a fiend in human shape, named Elizabeth Craig, a white woman whose husband is a negro. The evidence elicited before the coroner's jury shows that the victim was left with a smaller child by his mother, when Elizabeth Craig, who lived in another portion of the house, took the opportunity, and entered the apartment, and proceeded to the execution of the deed, which, it has been shown, she had previously threatened. With horrid imprecations of "damn you, damn you," the child was held on the fire by its tormentor, until its legs and bowels were burned to a cinder; then with satanic revenge, the body of the child was roasted by the murderer, until its back was roasted to a crisp. The child lingered in an unconscious state till Thursday morning, when it revived sufficiently to reveal the name of its murderer.

**SNOW.**—The telegraph on the 1st inst., announced the fall of snow at Washington City and through New York and eastward. At some places, at 1 o'clock, it was over a foot deep.

Hon. John M. Clayton is seriously ill. His physicians think it doubtful if he will ever recover.

The vote in Campbell's District in Ohio is one of the closest on record. Campbell got 9,338 votes, and Vallandigham 9,330—a difference of 8 in nearly 19,000. The election is to be contested. Mr. Vallandigham insisting that some twenty odd negroes voted for Campbell.

**Election Day in New York.**

**Election Day in Baltimore.**  
BALTIMORE, Nov. 4.—Considerable rioting has occurred at the polls in the various wards, during which pistols were freely used. Several persons have been shot and one man is reported fatally wounded.

**THE AGE OF GOLD.**  
During the past four years, California has exported about \$200,000,000 of gold, while Australia, during the same period, has brought to light and sent out into the world, a like quantity of the precious metal.

This shows an annual new supply of ONE HUNDRED MILLION DOLLARS OF GOLD, added to the world's currency. But in reality, these wonderful gold discoveries have added during the past four years fall Twelve Hundred Millions of Dollars to the money currency of the world.

The accession of every \$100,000,000 of gold gives basis to at least three times that amount of money credit, setting the same purpose as money in all the transactions of commerce.

Indeed, the credit superstructure, which commercial finance builds upon a gold basis, is often infinitely greater than this.—For evidence we need only look to New York, with a gold basis of \$12,000,000, supporting loans, to the extent of \$100,000,000.

The United States census in 1860 will show startling results in the progress of the United States during the present decade.

It seems a miracle to many that such mammoth railroad schemes, suggested during the past few years, should have found means for their completion.

These gold out-pourings, into the money reservoir of the world, offer however an explanation to the miracle.

As rapidly as was our growth and prosperity for the ten years ending in 1860, we doubt not that the census of 1860 will show a growth in wealth and population equal to any 20 years before.

**Mexico.**—The New Orleans papers of the 26th ult., furnish the details of the late news from the northern frontier of Mexico. Vidauri took possession of Mier without resistance, the government troops retreated there returning to Camargo on the 10th ult. Vidauri recommenced an attack on Camargo, but at the latest dates neither party was successful.

Carvajal had gone to Camargo, the invasion of Garza to take command of the government forces. Accounts from the Rio Grande, state that Vidauri was popular on both sides of the river, and has at his command men and means sufficient to secure success.

## DANVILLE

Friday, Nov. 7, 1856.

FOR SALT RIVER.—The true and tried steamer "Union," MILLARD FILLMORE, Master, will leave as above at an early day. For freight or passage, apply on board.

WANTED AT THIS OFFICE.—A copy of "Zimmerman on Slavery." Persons having said book will please send it to our address "up Salt River."

NOTICE TO CORRESPONDENTS.—Those of our correspondents who are writing to us on political subjects, will please in future direct their favors to our old post-office, at the head-waters of Salt River.

"LITTLE BOYLE" ALL RIGHT.—Amid the evidences of defeat by which we are surrounded, it is refreshing to look at the noble manner in which our county has stood up for Fillmore and the Union. In almost every other county in the State, so far as heard from, the vote shows an American loss, but Boyle, always reliable in a patriotic cause, comes up with her usual majority—over 300 for the American ticket. This county can always be depended upon. In every contest, her majority is about the same, proving that a nobler, firmer set of American patriots never breathed, than those whom we are proud to claim as our fellow-countymen.

THE ELECTION NEWS.—We give in another column all the most definite of the election returns which have yet reached us. The returns are very scattering and unsatisfactory, and later advices may possibly change the appearance of affairs, somewhat. As at present advised, however, we can entertain but little doubt of Buchanan's election. Our country, already the bleeding victim of misrule and corruption, is destined, we fear, to encounter worse evils under the administration of James Buchanan—continued agitation—filibusterism—war at home and war abroad—the whole to conclude with the dissolution of the Union. What a future lies before us! The contemplation of it is enough to sicken the heart of every patriot in the land.

FIRE.—The residence of Mr. EDWARD HUGHES, in this county, about 3 miles from town, was totally destroyed by fire on Thursday night last, together with most of the surrounding outbuildings. Very little of the furniture in the house was saved. The fire is thought to have been the work of an incendiary.

THANKSGIVING.—It will be seen, by an eloquent proclamation which appears in our columns to-day, that Gov. Morehead has set apart Thursday, the 20th inst., as a day of general thanksgiving and prayer.

JUST THE SAME.—It is certainly possible, (says the Louisville Journal,) that James Buchanan has been elected President of the United States. No election, however, can change the facts of his history. Whether he is President elect or not, he is just as much the slanderer of Henry Clay as he ever was, just as much a squatter sovereignty abolitionist as he ever was, just as much an ostend filibuster as he ever was, just as much the cent Jimmy as he ever was.

"AMERICAN SENTINEL."—We have received the first number of a new paper bearing the above title, and published in Lancaster, Ky., by L. N. ZIMMERMAN. The Sentinel is a neatly printed sheet, evincing a good degree of typographic skill and taste. It is American in politics, and bids fair to render itself worthy of a liberal support. A long life, a long list of paying subscribers, and long columns of fat advertisements, to the Sentinel!

HOGS AND PORK.—The Cincinnati Price Current of the 29th reports contracts for 50,000 hogs have been closed in that quarter, chiefly at 6 and 6½, net, for early delivery. The packing season there will soon commence. The same paper reports sales of mess pork at \$17 per bbl., while at the same period last year pork was held at twenty dollars.

The Gazette says hogs were packed in that city on Saturday, by two houses, and sales made at \$6.25.

The Louisville Courier says the prevailing price among holders in that city is 6½ net. Pork is freely offered at \$17 per bbl.

Kansas just at this time seems to be quiet, but how long it will remain in that pleasant condition, it is impossible to tell.

## Vote of Boyle—Official.

The following is the complete vote cast in this county on Tuesday last:

District No.	Fillmore.	Buchanan.
1	175	155
2	275	251

4	363	302
5	314	—

The voting places of Districts Nos. 1 and 2 are in Perryville, and those of Nos. 3 and 4 in Danville.

## Election Returns.

### KENTUCKY.

Our returns from this State are very meagre. Though not sufficiently full to indicate with certainty, the precise result in the State, the fact that in almost every county heard from, the returns show a Democratic gain, leads us to believe that Old Kentucky has been lured for a time from her proud conservative position in favor of the Union and against sectional strife and agitation, and has cast her vote for Buchanan. The full returns may prove that such is not the case, but we must admit that we do not look for them with any degree of confidence.

ST. Shelby Stone, late a member of the Kentucky Senate, is in a dying condition, and successor, Mr. Bledsoe, was killed by the stage upsetting near Glasgow, on Friday, the 3d inst. up Salt River.

The above is wholly incorrect. In the first place, Mr. Stone died more than a month ago, and in the second place, his successor in the State Senate, Col. Jos. S. Bledsoe, was alive and well at last accounts. The gentleman killed by the upsetting of a stage coach, was H. M. Bledsoe, Esq., a promising young lawyer, son of the Senator elect.

## Proclamation by the Governor.

EXECUTIVE OFFICE, FRANKFORT.  
In pursuance of an established custom, it is deemed appropriate to set apart a day in which, when the people, laying aside their daily avocations, may assemble together to present to Him who rules on high, the offering of grateful hearts, for blessings which have been bestowed upon them in boundless profusion.

The present is a season of the year naturally associated with solemn and serious thoughts. The sun has withdrawn his fervent heat, and the earth is now shedding her crown of glory. The winds are scattering the falling leaves, and the language of nature invokes its voice with that of revelation, and summons us to prostrate ourselves in adoration, and with contrite and grateful hearts, to return humble thanks for all the goodness and mercy of God, and looking beyond the boundary of time to seek amid the desolation and decay "those green pastures and those still waters" where to the pure in heart there is an eternal spring.

During the past year we have been especially favored. In every part of our State the voice of joy and gladness has been heard. We are in the enjoyment of unparalleled prosperity. The form of government under which we live, secures to us life, liberty and property, and the right of worshiping God according to the dictates of our own conscience. We live in a land of freedom and are subject to no oppressive exactions. We have a fertile soil and a salubrious climate. The summer sun has ripened for us the fruit of the earth. God has crowned the year with his bountiful goodness, and notwithstanding a long continued drought, our land is filled with plenteousness.

For these and all other blessings of Divine Providence, it is becoming a Christian people with united voices to bow before the throne of Mercy in pious thankfulness, with hands uplifted in praise and hearts full of gratitude, and through the merits of the Divine Redeemer to invoke their continuance.

Wherefore, I, C. S. MOREHEAD, do hereby set apart and appoint, Thursday, the TWENTIETH DAY OF NOVEMBER, 1856, to be observed as a day of public thanksgiving and prayer, and do hereby recommend and request the people of Kentucky to observe the same auspicious.

IN TESTIMONY WHEREOF, I have hereunto set my hand and caused the seal of the Commonwealth to be affixed this 31st day of October, 1856, and in the 66th year of the Independence of the United States.  
BY THE GOVERNOR, C. S. MOREHEAD.  
MAJOR BROWN, Secretary of State.

DANVILLE, KY.  
Friday, November 7, 1886.

A Florida correspondent of the Philadelphia Ledger mentions as a rumor, that a treaty is now on foot between the United States and Florida Indians, which is likely to result in peace. Report is that the Government has engaged the services of some of the Seminoles, who have emigrated west of the Mississippi, and that Alligator is now at Tampa, in conference with Col. Monroe.

**PLOWING WITH THREE HORSES.**—Few farmers are aware of the advantage of plowing with three horses instead of using only two, as is the common method. For breaking-in colts, particularly, this is a very practicable method. A colt may be placed on the near side of a span of horses, making him pull on the end of a sweep against the span—on the principle of a steel yard, the length to be proportioned according to the strength and endurance of the unsteady movement of the colt. To prevent the plow from running too much to land the clevis will have to be placed on the near side—or, better yet, a plow beam sprung sufficiently to the near side substituted for the old beam. In harrowing, also, a much greater amount of work may be done than with only two horses. The three-horse team gives a power and steadiness of movement truly surprising to those who have never tried such a team before.

**CHEAP ICE HOUSE.**—A correspondent of the American Farmer furnishes the following:  
We will give you our experience with a cheap ice-house. Four years ago last January, we had one dug, of the following dimensions, viz: ten feet every way; this was dug on high ground into a firm clay, after getting to this depth, we laid the bottom made into the bowl shape, and laid down small logs across it; at the surface we had a row of logs around the edge, to the height of four feet, and the dirt that came out of the hole was thrown up and rammed around the pen; this pen increased the depth to fourteen feet. The part in the ground has no walling of any description. When filling, we have a small quantity of straw kept between the ice and the earth. Fifteen wagon loads will fill my house, and it has been empty but once in four years, and that was in November, and then it was emptied by taking out cart loads at a time for extraordinary purposes. After the bank was thrown up around the pen, we set in four blocks at the corners of logs, twenty feet long; they were cut this length in order to throw the eaves some five or six feet from the ice, and thereby secure it from the intrusion of water. There was left sufficient space between the logs to admit a free circulation of air. The walls have crumbled very little—more the first year than any since, and this was caused by rats. We paid a workman four dollars for putting on the roof, hanging doors, etc., and this was the whole cost, two days, digging and putting up the logs, and the cost of materials.
